**Purpose of Visit:**

The primary purpose of this visit was to assess the Gulf Diamond Factory's capabilities and experience with the metal doors system and to evaluate their expertise on similar projects

(3)

**Factory Overview:**

The factory is well-organized, clean, and equipped with modern machinery. It has all necessary materials for metal door manufacturing, including a paint oven, and is supported by a complete in-house technical team

**Recommendations:**

I **highly recommend** the factory based on its cleanliness, organization, modern equipment, and the presence of a skilled technical team capable of delivering high-quality metal door production.
